

**What are ScentCerts?** Scented inserts made with FDA approved ingredients and All Natural flavors encapsulated in a BPA free polymer blend designed to hold and release scent and flavor into vitamins, pharmaceuticals and nutraceuticals.

**Why ScentCerts?** Because many pharmaceutical and nutraceutical products have active ingredients that cause off smell and taste which often leads to non-compliance, or decreased consumer acceptance. ScentCerts deliver significantly improved aroma and taste of vitamins, nutraceuticals, and pharmaceuticals.

**How do they Work?** Just drop a ScentCert into a bottle and smell the difference! Off smelling and tasting ingredients suddenly smell and taste great!

**What are they made of?** ScentCerts are made of safe FDA approved ALL Natural, non GMO FDA GRAS (Generally Recognized As Safe) food grade flavors, encapsulated into a food grade BHP Free, Non Toxic, polymer blend to keep the aroma long lasting and stable.

**Why add ScentCerts to your product?** ScentCerts are designed to deliver enough aroma to make even the worst smelling products such as fish oil, vitamin B and valerian. Simply drop in a ScentCert for a great smelling product.

**Can ScentCerts be customized?** Yes, although we offer stock ScentCerts in a range of great smelling and tasting flavors, we can make practically any flavor or shape you desire.
